Research Interests and Experience

My research focuses on occupational mental health and psychological assessment within industrial psychology. I am particularly interested in work engagement, burnout, psychological distress, and overall mental health among employees. I also have broader research interests in mental health among young adults and other populations, together with developing interests in cognitive psychology.

Research expertise and methods

I have experience in research design, data collection, and manuscript preparation for peer-reviewed publications.

- SPSS, AMOS, JASP: descriptive statistics, group comparison tests, regression analysis, exploratory factor analysis, and confirmatory factor analysis
- SmartPLS: partial least squares structural equation modeling
- R: developing coding and statistical analysis skills

Research laboratory

Member, Psychological Research Laboratory

2019–Present

Supervisor: Vinh-Long Tran-Chi, Ph.D.

Ad hoc reviewer

Springer Nature journals listed in the supplied CV include:

- *BMC Psychology*

- *Discover Psychology*
- *Scientific Reports*
- *Discover Public Health*
